

**VARINI
MARIO**

SINCE 1960

A professional workstation featuring a light-colored wooden desk with a curved, adjustable surface. A modern, cylindrical lamp is mounted on the desk. The workstation is supported by a white metal frame. The background is a textured, light-colored wall.

LUX™ Series

Professional workstations
focused on the person

**Craftsmanship, attention to detail
elegance and design unite with
the most innovative research
to offer modular workstations
that are adjustable and ergonomic**

ERGOLUX

A workbench designed for exacting customers

Dedicated to those seeking ergonomics and functionality whilst being attentive to detail, style and design to enhance the workshop and render the space unique. Entirely customisable in

the choice of finishes and colours, they are equipped with electric height adjustment with memories and Bluetooth® control that can also be managed via the app.

Worktops in latest-generation laminate with nanotechnology-based antibacterial or antistatic treatments or even in Corian® Laminate. What's more, the bench is available in high-quality solid bamboo. The worktop is embellished with the integrated electrified bar for the addition of adapters suitable for any country, USB chargers for smartphones and Bluetooth® speakers, according to

the specific needs. In addition to aesthetics, the workstations also require practicality and modularity, hence why it is possible to install the multifunction bar in aluminium with supports for microscopes, tablets, monitors and containers of various types for each exact request. Available in the version for watchmakers, dental technicians, goldsmiths, stonemasons and industry.

ECOLUX

An entry-level workbench
rich in features

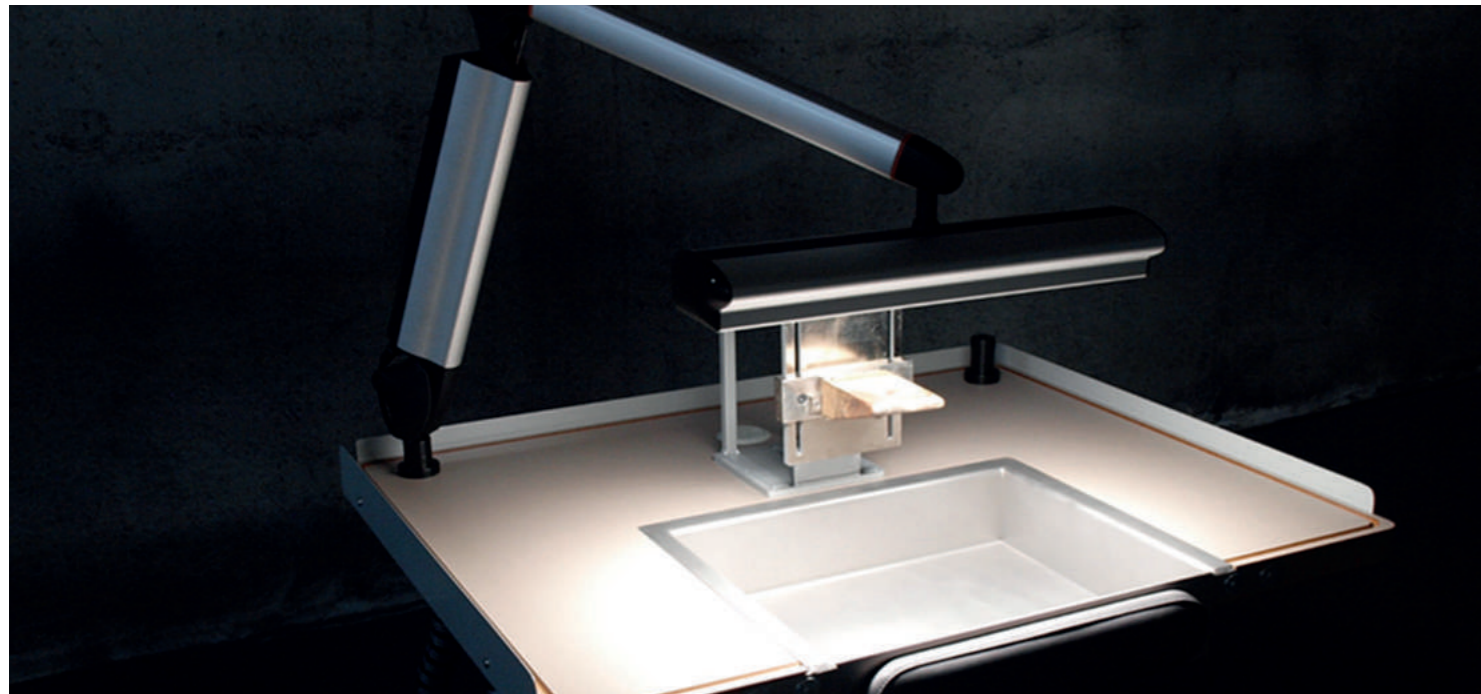

The entry-level workbench requires no sacrifices, being equipped with a lush outfitting at an attractive price. Amongst the top of the range, ERGOLUX holds all technological innovations such as electric height adjustment with memory and apps, electrified bar and the choice of materials

and finishes for the surfaces. It is equipped with all of the predispositions to install each available optional even at a later point in time, such as the handy multi-function bar, bench light, the “Eolus” compressed air system, sets of drawers on wheels and much more.

GOLDSMITH VERSION BENCH

With 3d elbow rest and adjustable height

BENCHES FOR SETTERS INDUSTRY

With adjustable height, stainless steel hole, wedge holder turret adjustable in height and depth.

INDUSTRY VERSION BENCH

With adjustable height and sliding elbow rest

ON/OFF switch-adaptor

With integrated blue LED light, it has all international adapters available, dual USB charger and Bluetooth® speaker. Possibility to add additional adapters.

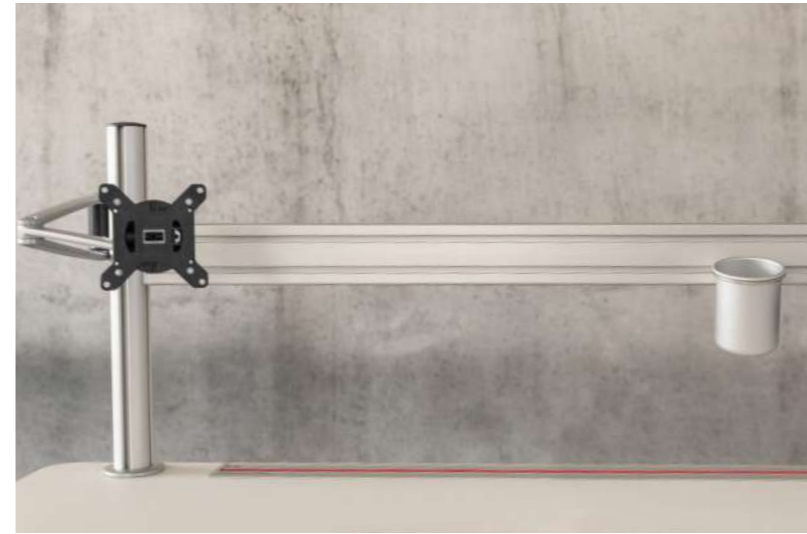

Elbow rests with 3D adjustment

Silver ion coating to prevent the formation of smells and stains that promote germs and bacteria. Very high abrasion resistance.

Electric control

Practical and intuitive to use — the work surface can be moved simply by tilting the control in the desired direction. The app can be employed to adjust the height, set the memory and simultaneously — through reminders — incentive the operator to change their posture.

Multifunction bar

Multifunction aluminium bar, configurable with monitor arms, microscope holder and tablet holder, along with various types of containers to personalise the workbench.

Orthodontic wedge

Solid wood suction wedge with adequately-sized central hole for both powders and processing residues. The wedge is complete with protective screen.

Goldsmith suction wedge

Aspiration with integrated double nozzle, swivelling and adjustable to find the optimal position for the work to be performed.

EOLO SYSTEM

Air-vacuum system with pressure gauge, independent adjustment for suction and blowing, additional air socket, level filter and condensation filter.

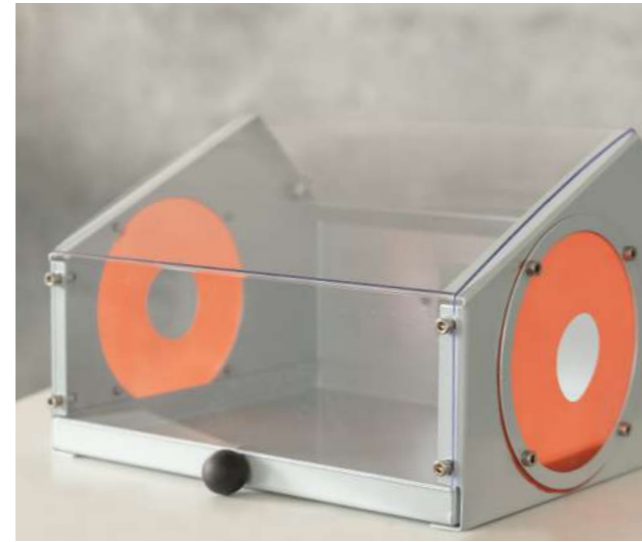

Air blower and suction apparatus

With ergonomic handles, complete with flexible and swivelling hoses with automatic retraction.

Aspirator

With three-phase cable system. Microfibre bag, M-class cartridge filter and HEPA exhaust filter. Power tool socket with automatic start-up and shut-off system. Power adjustment. On request, it is also available in the Brushless version.

MINILUX

Portable watchmaker bench, supplied with a drawer, bearing an insert in golden bamboo and predisposition for elbow rests with 3D adjustment.

Airbox

Steel and lexan box with removable drawer for dust recovery and suction attachment.

Compressor

Various silenced compressor models available, being oil-free, with desiccator, suitable for all work environments.

Design cable holder

Thanks to the cable carrier vertebra divided into three sections, and the integration of retractable electrical and pneumatic connections on the work surface, it offers benefits in terms of safety and improves the design of the bench.

Bench light

LED bench light equipped with 3 different colours and controlled independently, all of which can be dimmed and overlapped: daylight (6500°k), cool light (4000°k) and warm light (3000 K).

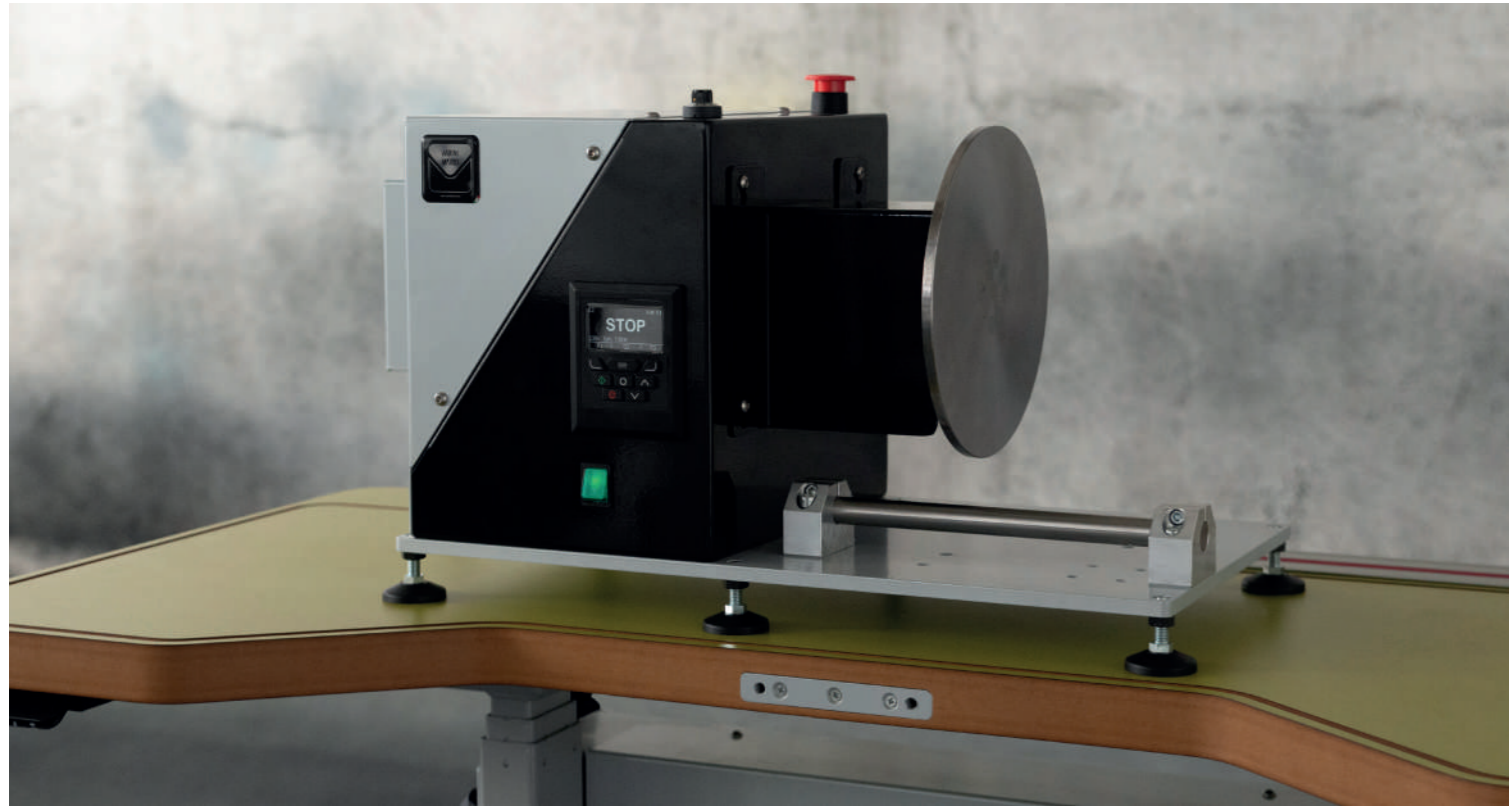

Bluetooth® control with dedicated app.

Chairs and stools

High-quality chairs and stools available with multiple adjustments for optimal ergonomic posture and seating.

LAPPING MACHINE

ALL-IN-ONE MULTIFUNCTION MACHINE:

- High precision chuck with ER32 collet attachment
- Working speed adjustable by potentiometer
- Also available in the version with 7" touch screen display with preset speeds storage
- Lapping disc diameter 240 mm balanced for high speed
- Support stainless steel bar diameter 20 mm length 300 mm for spindle

Supplied with a chuck with ER32 collet, the machine allows quick replacement of accessories (disc, belt grinding kit etc..)

Belt grinding machinery accessory

Additional disc for lapping machine

Tilting, adjustable and height-adjustable work table for lapping and belt grinding machines
